#### About Marine FUTIN

For me, art is a place of spontaneity, joy, and possibility. Whether through sculpture, painting, pastels, or music, I've long had a love of using art to express myself. My work has been exhibited and recognized across the globe including as a participant at the prestigious Salon des Artistes Français in Paris. In 2015, I recorded and released my debut album, Qui Danse, performing my music at renowned venues like the Apollo Theater and the Blue Note in New York. While my artistic focus is constantly evolving as I grow and learn, a pivotal aspect of my work is helping others feel more in tune with their own creative forces, as well as encouraging genuine human connection with those around us.
